In accordance with the Site-wide Excavation Plan, enclosed for your review is the draft Project Specific Plan (PSP) for Waste Pits Remedial Action Project Investigation of Waste Pit Liners and Liner Subsurface Material. This PSP proposes the sampling strategy to investigate the possible presence of contamination in the clay liner material and the material below the liners within the waste pit floor area currently uncovered by excavation. This activity will be conducted in multiple phases as excavation of the waste pits progresses. The information from this investigation effort will be used to facilitate the remediation of the waste pit liners and underlying material.
